

# TIMELINE of the Life of Norman Rockwell

**Interesting Fact:** Next week's artist, Georgia O'Keefe, (1887 – 1986) was born before Norman Rockwell, but died after him. So even though she technically doesn't appear on this timeline, she was alive and working throughout Rockwell's life and career. If you put her in the timeline, pick your dates, beginning or end!

<sup>2</sup> Some art scholars actually believe the end of the “Modern Period” of visual arts was in the 1970s. This was followed by the “Postmodern Period” (roughly 1970s – present). Some scholars even believe the “postmodern” period is drawing, or has drawn, to a close. Others view “postmodern” as a subsection of “Modern” art. It is all pretty much open for debate. However, if you ever hear someone talk about the “Modern Period of Art” as though it has ended, this is why.
